All of these points he still adheres to, and he does so because he believes it to be right and the only course to pursue in order to promote, as far as possible, the purity as well as the freedom of elections and to free the parties from the domineering methods too frequently adopted by the dominant party, through their office-holding friends, for the furtherance of personal and secrections of elections and to free the par-ies from the domineering methods too requently adopted by the dominant par-y, through their office-holding friends, for the furtherance of personal and sec-cional feelings, but the President said pos-tively that he did not originally intend, and does not hold now, that the order was in the least a disqualifier for any officer under the Government to does not hold now. sy, through their office-holding friends, or the furtherance of personal and sectional feelings, but the President said postively that he did not originally intend, and does not hold now, that the order was in the least a disqualifier for any officer inder the Government to donate voluntarity of the said that he party to which their sympathies and feelty becomed, and further he said that he considered it the patriotic duty of any man who held an office under the Government, to the form in the first upon the little form it which fell with a jingle, and she turned away, sobbing as if her heart would break. A News reporter, who happened to be sump, to tender his services for that purpose, and if he was a writer and could write for the press, he would consider it bis dutt at dress and the same instinct which who held an office under the Government, if he was capable of acting as a speaker on the stump, to tender his services for that purpose, and if he was a writer and could write for the press, he would consider it his duty to do so, using his pen as well as his tongue for the benefit of his party; but that if he declined to contribute either money, voice or pen towards the support of his party it would not in any way interfere with his position in the Government. This, in substance, is what the President said to me, and it would be well enough to have it more publicly known."

THE WOOL MARKET.

There does not appear to be any decided The endencies on the general market at the and neither buyer or seller making much of an effort for advantage. the ludicrons mistakes at a recent school examination there, says: Although the replies indicated a reasonably high degree of proficiency among the scholars, some

ludicrous mistakes were made.

A boy was told to correct the following sentence: "Milo began to lift the ox when he was a calf." The reply was: "Milo, when he was an ox, began to lift the calf."

A little boy was asked: "What are the principal minerals in Nevada:" He replied, without the least hesitation: "Gold, silver and trout!"

To the question, "How would you go from New York to San Francisco by water?" a boy in the same department replied prompily, and with the utmost assurance: "By boat!"

Another schalar in the same class being asked, ""Why do we celebrate the Fourth udicrous mistakes were made.

asked, "Why do we celebrate the Fourth of July?" answered unhesitatingly: "Be-cause three Presidents died on that day." A boy in the high school, having been required to give the plural of two, answer-ed; "Three!" and resumed his seat with a self-satisfied air.

Fruitfulness of a Grain of Wheat. If, says a writer in a German contemporary, we reckon that a single grain of wheat produces fifty grains, and that these fifty grains will each produce fifty grains more, and so on, we find:

men one meal, leaving enough branto feed eight pigs for one day. The producs of the twelfith year would suffice to supply all the inhabitants of the earth with food during their life time.

Civil Service Matters.

WASHINGTON, July 10,-The stories that the President contemplates rescinding his denial when those in quest of informa tion on that subject go to him for it. He says that so far from revoking the order he hopes to have it better enforced. It is not a failure. As to political assessments, he says that he is perfectly willing office-hold ers should contribute as much as they like to the Republican campaign fund, and in-

deed would be glad to have them do so it they choose, but he is very emphatic in his purpose that they shall not be forced. He says that while office-holders may contribute to the campaign fund, they shall not be threatened with discharge from the service lor failure to do so. He is opposed to assessments, as the tering goes, when a threat of discharge is held over the employes if he does not shell out.

The President says there has been some pressure upon him to get him to rescind his civil service order, but less now than formerly. It is working pretty well, although often violated, but far oftener observed than violated. Every violation of it is conspicuous and gets into the papers, and is frequently made a subject of ridicule, but the thousands of instances where cule, but the thousands of instances where t is obeyed escape notice. This, in brief, s the President's observations on the subect. The President says that when Congres adjourned and the members came up to say good-bye, many spoke of being detain-ed over one or two trains in order to visit

He told me that when he issued the order
he had but three objects in view, and so
far as they were concerned he still adhered
to them; first, to prevent office-holders

There was a baby funeral in Mount Elliott Cemetry yesterday afternoon. There were but three mourners-the father and mother and a little girl-in attendance. to concentrate in themselves more sorrow than usually appears in more pretentious funeral pageants. The little, common, mother, moved by the same instinct which prompts the Indians to bury all the weapons and implements of their warrior dead in their tombs, threw that toy into the grave of her babe, to accompany it to the spirit-land.

A New Theory as to the Hard Times.

The cause of the present financial de ression has just been definitely determined by brother Zevely, of the Ritchie Der crat. According to that philosopher it is crat. According to that philosopher it is 100,000 canary birds, that cost annually \$223,000 that are causing all the trouble. The figures given are probably right, but we don't exactly understand how that amount of money "would supply every inhabitant of the land with a barrel of flour, pay church dues, build churches" besides leaving a surplus for the other necessary articles.

The Wheeling INTELLIGENCER sharply criticises the prevalent style of cheap, hurried excursions to Niagra Falls, and deing tickets good for return on any train within a limited number of days, ten at within a limited number of days, ten at the least, instead of rushing excursionists over the route to and from the point of destination, without a moment's rest. This is a change much needed, and we trust the INTELLIGENCES will succeed in its efforts for reform.

Dunbar's Wonderful Discovery. OFFICE OF HOLBROCK, RICHMOND & Co., MANUFAS OF CARPET WARPS AND TWINES, SOUTH ADAMS, MASS., December 20, 1807. Cot. Richard Dunhar.—Deer Sir: I not only take pleasure, but feel it a duty to testify in behalf of Bethesda Spring Water, as my cure may give confidence to many in this section afflicted with kidney diseases who have known my situation.

cure may give condence to many in this section afflicted with kidney diseases who have known my situation.

I have suffered for more than a year from what is known as Saccharine Diabetes, and for its cure tried almost everything I could hear of. Was finally induced by Dr. G. R. Bennet, of Brooklyn, N. Y., to try Bethessa Water. I immediately started for the spring at Waukesta, Wis., and began the systematic use of the water under your direction, with the prescribed diet, to my great relief; began to improve immediately; in two days the great thirst and foul mouth from which I had suffered so long had disappeared; also began to gain in flesh; the first week I gained 1¼ pound per day. Am still under treatment, and feel that I am on the high road to health. Thanking you, Colonel, for your kindness while under treatment. People should beware of spurious water sold as Bethesda, for the genuine has the merit claimed for it, as I know by my own experience.

Sense of Smell and Taste Recovered.

I feel compelled to acknowledge to you the great benefit Saxronn's Rancas Cuan has been to me. For ten years i have been afflicted with this loathsone disease, and especially in the winter time has it been most severe. The discharge has been thick and bloody, emitting a foul odor so bad that my presence in a room with others was very offensive to them. One week after commencing the use of Sayrone's Rabicta. Cuan I was not troubled with it at all. My senses of taste and smell, which evere wholly gone, have now fully returned, and my general health is much improved.

GRAND RAPIDS, MICH., Nov. 3, 1876 10 YEARS A SUFFERER.

From Hon. Theo. P. Bogert. eeling thoroughly convinced of the effica-carrond's Radical Cure for Catabri, of Sabrord's Radical Curre for Cataren, I am induced to drop you a line to say that although I have been sceptical of all the noctrums advertised as "radical curres." I have never found anything that promises such relief and ultimate cure as that of Sabrord's. I have been afflicted with this dreadful disease for more than ten years, and not until recently could I be induced to persevere with any until I read the letter of Mr. Henry Wells (of Wells, Fargo & Co.) and can truthfully say that after using five or six bottles I am thoroughly convinced of its curative properties. Hoping that others similarly afflicted like myself will be induced to make the trial.

I am, gentlemen, very truly, etc.

THEO. P. BOGERT.
